FAMILY-OWNED, AUSTRALIAN MADE, LOCALLY TRUSTED

At Activity Playgrounds, we believe every community deserves a safe, inspiring place to play.

For over 30 years, our family-owned Australian business has been designing, manufacturing, and installing playgrounds that encourage creativity, movement, and connection.

From our workshop in Victoria, we build play spaces that are locally made, built to last, and designed for real-world fun, supporting local jobs while ensuring councils, schools, and communities get quality they can trust.

RESILIENCE

Where Play Meets Performance

Our Resilience Range is where innovation meets heavy-duty performance. Constructed using premium Australian steel and HDPE panels, this range is ideal for high-traffic areas like schools, public parks, and community hubs.

Australian Steel

Our steel is fabricated at our factory in Victoria's Yarra Valley using Galtube-Plus stock, which is galvanised on the outside and painted on the inside for maximum durability.

HDPE

Engineered HDPE for exceptional strength, safety, and UV stability.

Steel Rope

Durable steel reinforced rope with an internal steel core and precision-woven outer for lasting performance.

Big Play for Small Spaces

Built for compact sites without compromise, our smaller Resilience combination units deliver impressive play value through efficient layouts and durable Australian-made construction.

Each design combines climbing, balance, and imaginative elements to create a dynamic play experience that keeps children active and engaged. Scaled for schools, pocket parks, and community spaces, these units make every metre count, proving that small spaces can still deliver big adventures, strong visual presence, and lasting performance.

AP7235A Dunnart Combination Unit

Equipment W: 4100mm L: 2865mm
Impact area W: 7700mm L: 6140mm
Height 3820mm

AP7237A Pygmy Possum Combination Unit

Equipment W: 3380mm L: 4485mm
Impact area W: 7330mm L: 7295mm
Height 3630mm

AP7231A Seaford Combination Unit

Equipment W: 3280mm L: 7285mm
Impact area W: 6175mm L: 10785mm
Height 3150mm

AP7236A Potoroo Combination Unit

Equipment W: 3010mm L: 4710mm
Impact area W: 6010mm L: 8210mm
Height 3370mm

AP7223A Oaktree Combination Unit

Equipment W: 4840mm L: 4630mm
Impact area W: 8430mm L: 7595mm
Height 2636mm

AP7238A Bilby Combination Unit

Equipment W: 4930 L: 5415mm
Impact area W: 7805mm L: 8380mm
Height 3630mm

Balanced Design. Lasting Play.

Combining compact efficiency with large-scale capability, our mid-range Resilience units deliver the best of both worlds.

Designed for variety, challenge, and connection, each configuration offers a balanced mix of climbing, sliding, and interactive elements to engage a wide range of ages and abilities. Scalable and adaptable, they're a versatile choice for schools, parks, and community spaces, providing enduring play value and architectural cohesion across diverse environments.

AP7148B Crows Nest

Equipment W: 7240mm L: 6465mm
Impact area W: 10660mm L: 9860mm
Height 4235mm

AP7240A Kookaburra Combination Unit

Equipment W: 3820mm L: 6535mm
Impact area W: 6825mm L: 9915mm
Height 3630mm

AP7239A Bandicoot Combination Unit

Equipment W: 5460mm L: 7160mm
Impact area W: 8760mm L: 10160mm
Height 3930mm

AP7244A Wheeler Combination Unit

Equipment W: 4610mm L: 7850mm
Impact area W: 8110mm L: 10740mm
Height 3930mm

Elevated Play. Enduring Design.

Expanding on the versatility of our mid-range designs, these larger Resilience units introduce greater complexity, and movement.

Engineered to deliver a higher level of challenge while maintaining accessibility, each structure combines climbing, sliding, and interactive zones to create an immersive play experience that appeals to a broad spectrum of ages and abilities. Built with precision and strength, these units are ideal for schools, recreation hubs, and community parks seeking a statement piece that balances scale, aesthetics, and long-term performance.

AP7172A Evelyn Combination Unit

Equipment

Impact area W: 9982mm L: 16325mm

Height 3012mm

AP7242A Wallaby Combination Unit

Equipment W: 8845mm L: 8515mm
Impact area W: 12475mm L: 12065mm
Height 3315mm

AP7241A Quokka Combination Unit

Equipment W: 7160mm L: 9625mm
Impact area W: 10400mm L: 12855mm
Height 3930mm

AP7193A Mooroopna Combination Unit

Equipment W: 5670mm L: 9105mm
Impact area W: 8860mm L: 12605mm
Height 3930mm

Strength in Scale

Engineered for high-capacity community spaces, our largest Resilience combination units combine architectural form with durable, Australian-made construction.

Generously sized and designed for a wide range of ages and abilities, they offer multiple levels of challenge, movement, and social connection. Built for longevity and visual impact, these units stand as the centrepiece of any modern playground, delivering lasting performance and inclusive play for all.

AP7321A Newbury Combination Unit

Equipment W: 8139mm L: 9685mm
Impact area W: 11355mm L: 12715mm
Height 3695mm

AP7317A Aspley Combination Unit

Equipment W: 7100mm L: 14095mm
Impact area W: 9900mm L: 17585mm
Height 3970mm

AP7245A Mulgrave Combination Unit

Equipment W: 8910mm L: 10585mm
Impact area W: 12485mm L: 14230mm
Height 4120mm

AP7318A Rivella Combination Unit

Equipment W: 5175mm L: 13155mm
Impact area W: 8310mm L: 16200mm
Height 3970mm

AP7035B Rochester Course

Equipment W: 7930mm L: 12560mm
Impact area W: 11130mm L: 15955mm
Height 4550mm

Why Choose the Resilience Range?

Built for High Use

Made with robust Australian steel and weather-resistant HDPE, this range thrives in busy environments.

All-Weather Reliability

UV-resistant materials, steel-reinforced components, and high-grade finishes that withstand Australia's harshest conditions.

Low Maintenance

Easy to clean and built to last, perfect for local councils and schools needing long-term solutions.

Fully Modular

The design flexibility of the Resilience Range means you can customise layouts to suit your space, age group, and play goals.

Proudly Australian

Designed, engineered, manufactured and installed by our team here in Australia. 100% local, through and through.

Resilience Spinners – Built for Motion. Made to Last.

A great addition to any playground project, our Resilience spinners bring energy, balance, and social connection to the play environment.

Crafted from durable Australian steel and high-quality components, they deliver smooth, controlled motion that supports coordination, balance, and teamwork. Available in a range of sizes and inclusive designs, these spinners invite children of all ages and abilities to share the fun. Built for longevity and minimal maintenance, they add dynamic movement and enduring value to every play space.
